Title: JP57125683A2: METHOD AND APPARATUS FOR PRESERVATION OF FOOD USING CARBON DIOXIDE GAS AND ETHANOL VAPOR

Country: JP Japan

Kind: A

Inventor: MOTOYAMA SHIMESU;
UMEDA SEIICHI;

Assignee: FUROINTO SANGYO KK
News, Profiles, Stocks and More about this company

Published / Filed: 1982-08-05 / 1981-01-25

Application Number: JP1981000009296

IPC Code: A23L 3/34;

Priority Number: 1981-01-25 JP1981000819296

Abstract:

PURPOSE: To increase the food preservation effect, by generating CO₂ gas independently to ethanol vapor, thereby eliminating the restriction on the quantity of the CO₂ gas.

CONSTITUTION: A CO₂-generating composition containing a carbonate (a compound which evolves gaseous CO₂ with an acid) such as ammonium carbonate, ammonium bicarbonate, etc. and an acid is put into a moisture-sensitive gas-permeable film bag, and ethanol is put into the same or another bag. The bag is placed separately from the food to be preserved. The ethanol is anhydrous ethanol absorbed to a carrier such as silicon dioxide and the direct contact of the ethanol with the gaseous carbon dioxide generating composition should be prevented, because the use of hydrous ethanol may cause immediate evolution of CO₂ gas with water contained in the ethanol.

TI - Carbon dioxide-generating compsn. contg. zeolite - comprises carbonate, solid or powdered acid e.g. succinic acid, and zeolite; used in tablet form to clean e.g. bath-tubs
AB - J58140312 (1) Compsn. (1) which generates CO₂ gas comprises (2) carbonate, (3) solid or powdered acid, and (4) zeolite. (4) is moisture-free. (3) is organic acid including citric succinic, fumaric acid, etc.
- (2) is pref. NaHCO₃ or KHCO₃, but Na₂CO₃ or K₂CO₃ may be also used. (4) may be natural or synthetic. A synthesised aluminosilicate of the formula, (M₂/nO)_x.Al₂O₃.(SiO₂)_y, is pref. (in which M is Na, K, Ca or Mg; n is equal to valence of M; x is 0.7-1.5; y is 0.6-1.0). Its moisture content is pref. as little as possible. (2)/(rate is (95-3)/(3-93), pref. (95-30)/(5-70). Amt. of (4) is 0.5-50 (2-30) wt. %, relative to mixt. of (2)/(3). Other components, e.g. organic acid salt, surfactants, etc. may be added into the compsn.(1).
- The compsn. when made into a tablet, preserves its foaming (CO₂-generating) performance after prolonged storage. It is useful for e.g. bath tub cleaning.(0/0)
